

CM18 Solo Personal Cash Recycler

A cash recycler
designed for
one person—you.

CM18 Solo Personal Cash Recycler

TO SHARE OR NOT

Sharing a piece of pie with your spouse or catching a movie with an old friend are communal experiences that bring people closer together. Sharing a cash recycler, not so much.

With that mindset, we created the personal cash recycler. It automates cash-in and cash-out transactions for a single operator, making the shared experience the one with the customer.

ENDLESS POSSIBILITIES

Our innovative adaptation of the traditional cash recycler was designed with an eye towards the future of cash handling. The CM18 Solo is a versatile machine built upon the most deployed cash recycling platform in the world.

Financial institutions can use it in a standard teller line setting, in a teller pod, or at a universal banker's desk. Retailers can use it to optimize processes in the front or back office.

SPECS
